

# Introduction

Since the foundation of KANON Loading Equipment B.V. in 1979 by Mr. Lex H.J. Kanon, the company has successfully supplied thousands of loading systems throughout the world. Many of these systems were 'customised' or even 'tailor-made', sometimes using unconventional solutions to meet specific requirements and provide '**best fit**' for every situation, which is one of the reasons of KANON's success.

This catalogue provides you with the most common KANON solutions to support you with safety and efficiency in the design of your loading facilities. The catalogue does definitely not provide all solutions; in case you do not find what you are looking for please do not hesitate to contact us through one of our agents or directly at our main offices in Holland and let the KANON team start working for you!
